Thorkild Jensen (DeiC)'s Note 01

Lato 11 B I U Hn

Forskningsnettet

Forskningsnettet er en landsdækkende netinfrastruktur, der forbinder de danske universiteter og forskningsinstitutioner med højhastighedsnet på tværs af Danmark og ud i resten af verden.

Målgruppen er alle, der anvender netværkskommunikation inden for forskning og uddannelse: Forskere, undervisere, øvrige ansatte og studerende.

Foruden den grundlæggende net-opkobling tilbyder forskningsnettet også særlige tjenester såsom parallel IPv4 og IPv6, mulighed for lukkede punkt til punkt-forbindelser og Lightpath.

Forudsætninger

Institutioner, hvis formål væsentligst er forskning og/eller højere uddannelse, kan blive medlemmer af forskningsnettet. Et medlemskab giver ret til fysisk tilslutning samt anvendelse af nettets tjenester. Eksterne tjenesteudbydere og dataudvekslingspartnere kan også tilsluttes nettet, men uden adgang til de øvrige tjenester.

Betalingsmodel

Prisen er baseret på den tilsluttede organisations årsomsætning og antal netværksforbindelser.

Samarbejdspartnere

Forbindelser til udlandet leveres i samarbejde med NORDUnet og GÉANT.

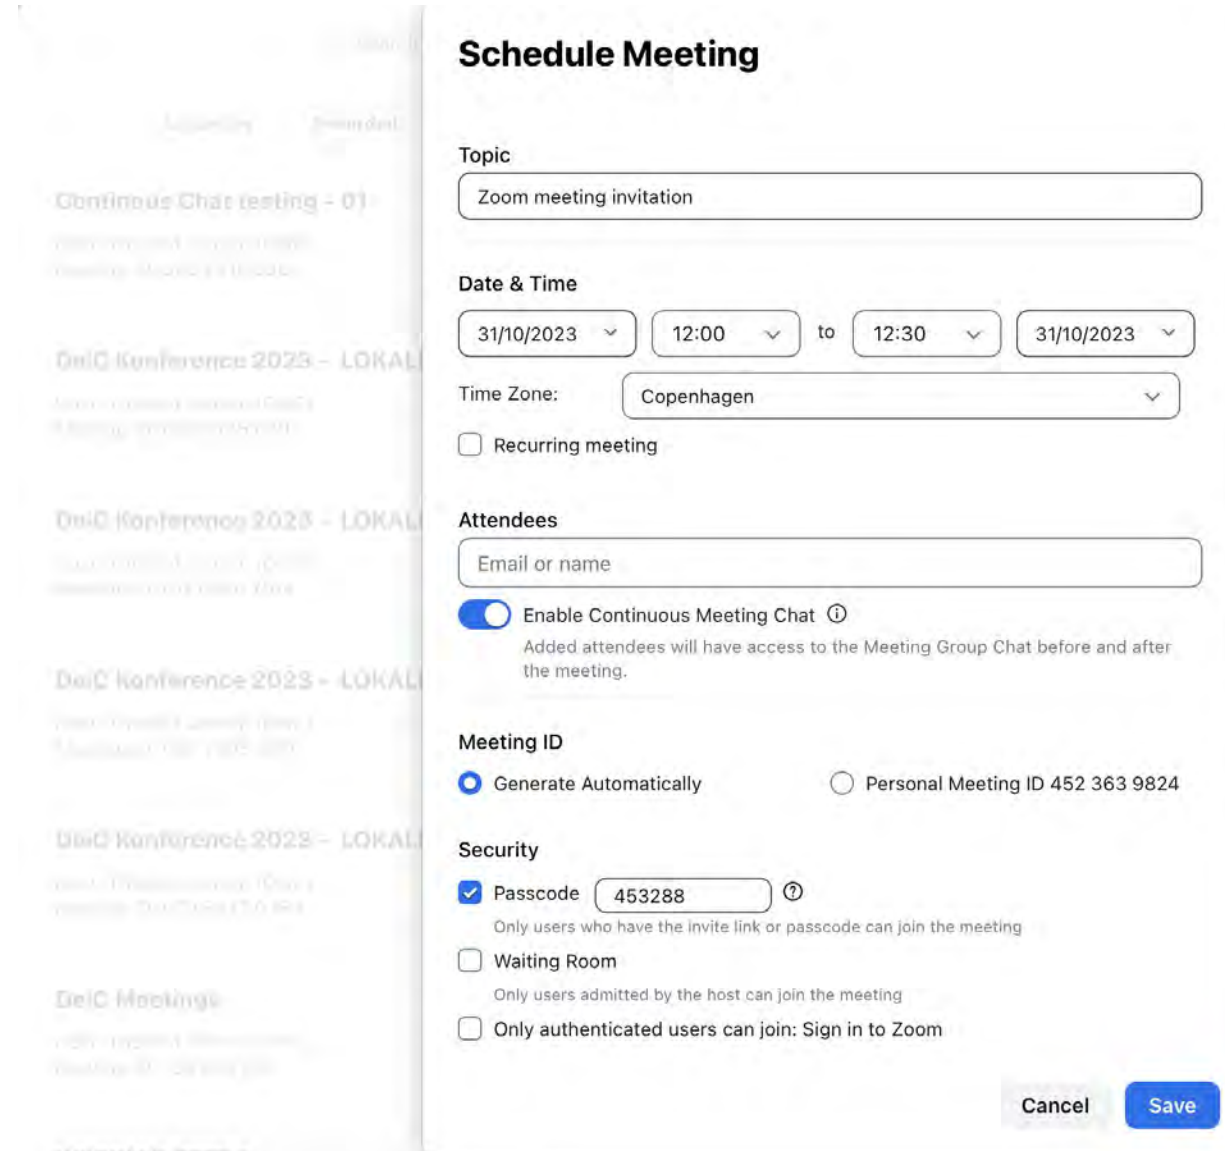

Teknisk beskrivelse

Forskningsnettet har sin egen fiberinfrastruktur med 1 Gbit/s og 10 Gbit/s Ethernetforbindelser. DeiCs Network Operations Center (NOC) ligger hos driftsleverandøren DTU i Lyngby, hvor også det centrale trafikknudepunkt ligger. Et tilsvarende knudepunkt er placeret i Ørsted, så
