Information about the call

Application in e-grant form opens:

4 February 2026

Application deadline:

20 March 2026

Applicant notification:

Mid-June 2026

Earliest start date

1 September 2026

Latest start date

1 December 2026

Evaluation committee:

National Quantum Algorithm Academy Evaluation Committee

Contact:

Louise Juel Broch

Consultant, DeiC

Email: louise.broch@deic.dk

Guideline version

2026.02

Background and implementation

In the Danish National Strategy on Quantum Technology part 1, DeiC is appointed to initiate activities “In order to support Denmark fully using access to quantum computers and supercomputers [HPC facilities] for the benefit of Danish research and innovation in the quantum field”ⁱ. In other words, to support the development of the next generation of algorithms and software related to future quantum computers and quantum simulators.

The DeiC Board of Directors has therefore decided to create Danish Quantum Algorithm Academy (DQAA). The academy will award scholarships on PhD and postdoc level to establish a national ecosystem for development of algorithms and software.

The PhD students and postdocs will be employed at the Danish universities or in Danish private companies (business PhD and business postdocs).

In addition to organising the scholarship programme, DQAA will manage a national coordinating function, with for instance support for workshops, meetings, a sabbatical programme, and other instruments which can boost a national quantum infrastructure.

The DQAA scholarship programme had two calls in 2024. In future years one annual call is expected.

The calls can be applied for by researchers from both the traditional STEM fields and by researchers from other fields such as health science, social sciences, and the humanities. Interdisciplinary applications are welcome.
All calls will be in free and open competition.

The programmes opening now are concerning a number of

- 3-year PhD Scholarships to be applied for by associate professors or full professors at Danish universities.
- 3-year Business PhD scholarships.
- 2-3-year Postdoc Scholarships to be applied for by PhDs
- 2-3-year Business Postdoc Scholarships to be applied for by PhDs.

The calls will be posted through DeiC communication channels (website, social media, and newsletter), direct mails to the Danish universities and for the postdoc calls through relevant scientific newsletters.

Both PhD students and postdocs must be affiliated with a Danish university as host university for the scholarship.

Postdoc Scholarship on Quantum Algorithms or Quantum Software

DQAA is offering 2-3 year postdoc scholarships in the areas of quantum algorithms or quantum software.

The scholarship is required to begin in 2026 and is conditioned on the successful postdoc applicant possessing a PhD degree not older than five years before commencing the scholarship.

Exceptions, such as maternity leave or military service, may be accepted if motivated and documented in the application.

The postdoc must carry out the project at a different university than where their PhD degree was obtained.

Scholarships can be awarded to perform research within both the traditional STEM fields or within other fields such as health science, social sciences, and humanities. Interdisciplinary projects are welcome.

The application must include a budget completed and signed by the host institution. The budget must be entered into the budget template.

The application must include a tentative estimate of the required access to quantum computing and HPC resources. Access to a selection of quantum computer systems, quantum simulators and HPC-systems will be negotiated separately as part of the DeiC Q-Access programme.

In connection with the application, the applicant must be affiliated with a Danish university and have an affiliated mentor from this university. The mentor should be a senior member of the relevant department's academic staff and will be responsible for the postdocs' professional development in the grant period.

As a rule, a researcher can only mentor for one postdoc funded from DQAA at a time.

The successful awardee and the mentor[s] become members of the DQAA and have the obligation to participate in activities related to the academy, e.g., working groups, schools, meetings, dissemination etc. and in general to contribute to the advancement of the Danish Quantum Algorithm community.

Application guidelines

These guidelines are intended to assist you in the application process when applying for a postdoc grant from DQAA.

It is important that you carefully read these guidelines before initiating the application process, as the guidelines contain the complete call text as well as instructions regarding the application.

DQAA will treat all applicants and application information confidentially, using the national grant system e-grant. Read more about personal data collection in e-grant in general and on how long your data is stored in e-grant.
<https://ufsn.dk/english/processing-of-personal-data-by-the-danish-agency-for-higher-education-and-science/>

When applying to DQAA, you must provide a comprehensive description of the Postdoc project, including details about the participants involved.

The application should contain the following elements:

- **Objectives and success criteria:** Define the goals of the project and the criteria for measuring success.
- **State-of-the-art and theoretical background:** Provide an overview of the current state of knowledge and any theoretical frameworks relevant to the project.
- **Project description:** outline the project's scope, methodology, and expected outcomes.
- **Expected publications:** List anticipated publications resulting from the project.
- **Courses, conferences, and international stays:** Detail the planned participation in relevant courses, conferences, and any international experiences.
- **Structure and timeline:** Describe the project structure and provide a detailed timeline.

Additionally, the application must include:

CV for advisor[s]: Provide CV for the university advisor[s]

CV for potential candidate: Include CV for potential candidate if identified

Failure to comply with the formatting and deadline requirements specified in the e-grant application form and annex templates, or use of incorrect templates, may result in DeiC rejecting the application without evaluation.

DeiC will publish the title, summary, and participants of approved projects online. Ensure that the title and summary do not contain confidential information.

Postdoc applicant

Information	Guidelines
First name	
Last name	
Phone Number	
Work email address	
Date of birth	
Nationality	
ORCID number	
Job Title	
Workplace and address	If the applicant is not currently employed at the host institution of the project, the application should clearly state, that the applicant will be employed at the host institution if the grant is received.
CV	(PDF) Please provide a brief CV, max two pages, with details of relevant educational and research experience. Specify what master's programme from which you have graduated.
PhD Degree	(PDF) Upload PhD degree or letter from PhD supervisor. The postdoc applicant should possess the PhD degree or provide adviser estimate of the completion date
Publication list	(PDF) Please provide a list of up to 10 most relevant publications for evaluating your experience. Include a complete specification of all authors for each publication with your own name highlighted. This document is solely for written publications authored by the applicant. Exhibitions and other non-written publications should not be included in this document. Include a link to full publication list in ORCID).
Supplementary information	(voluntarily) Use this field to make the review committee aware of any extraordinary circumstances regarding your application that the committee should be aware of. Please do not include any personal information of sensitive character (i.e. illness, family conditions etc.)

Mentor(s) of Applicant

Information	Guidelines
First name	
Last name	
Phone Number	
Work email address	
Nationality	
ORCID number	
Job Title	
Affiliation/university	The mentor must be from a Danish university
Department	
Department address	
Department website	
CV	(PDF) Please provide a brief CV, max two pages, with details of relevant educational and research experience. The CV must include a link to a full CV.
Publication list	(PDF) Please provide a list of up to 10 most relevant publications for evaluating your experience. Include a complete specification of all authors for each publication with your own name

	highlighted. This document is solely for written publications authored by the applicant. Exhibitions and other non-written publications should not be included in this document. Include a link to full publication list in ORCID.
--	--

Host institution

Information	Guidelines
Host university	The host university must be a Danish university
Address	
Department	(PDF) Description of the department the postdoc will be associated with
Leader of the administrating department	The person who will sign the grant agreement
Work email	
Phone number	
Administrative contact for the grant (Full name)	
Work email	
Phone number	

Proposal

Describe the suggested postdoc project providing the following information

Information	Guidelines
Project title	Maximum 150 characters, including spaces
Executive summary of project	Please provide a stand-alone summary of the project, describing its purpose, target group, and activities. The summary must be suitable for publication. Maximum 2.000 characters including spaces.
Project description	(PDF max 4 pages, including illustrations and references) Describe the project in detail here. The description can include purpose, hypothesis, methodology and relevance for the purpose of the call.
Description of mentor/role in project	(PDF) 1 page
Project planning	(PDF) 1 page
Estimate of required access to Quantum Computing and HPC resources	(PDF max 1 page). Describe the estimated required access to Quantum Computing and HPC resources for the project.
Reference letters	(PDF) max 3 references This is meant as potential project support letters meaning the reference letters concern the project, not the applicant. As such it should be seen as recommendations of the suggested project.

Evaluation procedure and selection process

The application must be submitted via e-grant, www.e-grant.dk.

The application will be evaluated according to the following criteria:

1. The experience of the applicant and mentor.
2. The scientific value of the project.
3. Relevance to the scope of the call, including the project's application perspective.
4. Change of research environment

Deadline for applications:

Material received after the deadline will not be considered. If the required material is incomplete, the application will be rejected administratively.

The deadline for this call is 20 March 2026 12:00 CET.

Evaluation process

We expect the evaluation process to be finished by Mid-June 2026

The evaluation committee is a group of 5 people with strong research experience in the relevant areas. Members are selected after the application deadline from a group of 15 subject matter experts. This optimizes discipline coverage and minimizes conflicts of interest.

Each application on the list will be assessed by 3 experts.

The committee makes recommendations to the DeiC Board who makes the final decision.

Appeals

According to Ministerial Order no. 615 of 29 May 2023 (Ministerial Order on Danish e-Infrastructure Consortium's Tasks and Organization, etc.) paragraph 18, decisions on the management and allocation of funds for digital research infrastructures and on the research network, including the allocation of computation time, cannot be appealed to another administrative authority.

From approval to project start

An approved postdoc project begins on the start date of the postdoc's employment at the host institution. The employment date must be on or after the date the project grant is awarded. The project must commence no later than six months after approval. If conditional approval has been given, the condition must also be met within six months. If the approved project does not start within six months of approval, or if the condition is not fulfilled within six months – for example, due to the absence of a candidate or the candidate not being graduated – the DQAA reserves the right to withdraw the grant.

Once the project is approved, DQAA will create a grant case in e-grant. You will need to submit financial statements, reports, and other documents related to the project obligations through e-grant. All project participants must be added to the grant case in e-grant. It is the responsibility of the project parties to ensure that relevant individuals are always attached to the case.

About Danish e-Infrastructure Consortium (DeiC)

The Danish e-infrastructure Consortium [DeiC] is tasked with the mandate to develop and coordinate cooperation on digital research infrastructure between universities covered by the Danish University Act.

DeiC's vision is that researchers at the Danish universities must have access to a digital infrastructure that enables research and education at a high international level.

Other relevant institutions with educational and research activities can participate in the collaboration after approval by DeiC's board.

DeiC's board consists of members at management level from the eight Danish universities, who all have a mandate from their own university. In addition, the Rectors College appoints a board chairperson for DeiC.

DeiC's legal basis is described in executive order BEK 615 of 26/05/2023.
