

Let's talk about FAIR data...

**"FAIR data?  
Why should I care  
about that?  
All that matters are  
citations and impact  
factors."**

Let's talk about FAIR data...

“With FAIR data,  
you can improve the impact  
of your publications,  
and make sure that you will  
get all the credit  
you deserve”

[www.vidensportal.deic.dk/FAIR](http://www.vidensportal.deic.dk/FAIR)

FAIR data are: **F**indable, **A**ccessible, **I**nteroperable and **R**eusable.

Making your data FAIR means maximizing the project's output, increasing your impact and enhancing your recognition as a researcher.
