

Let's talk about FAIR data...

**"FAIR data?
I do not collect any data,
I only use what is already
available elsewhere"**

Let's talk about FAIR data...

“FAIR data are easier to discover, share and re-use for research projects – across disciplines, institutions and country borders.”

www.vidensportal.deic.dk/FAIR

FAIR data are: **F**indable, **A**ccessible, **I**nteroperable and **R**eusable.

Making your data FAIR means maximizing the project's output, increasing your impact and enhancing your recognition as a researcher.
